SHERBROOK, INC.

ARCHITECTURAL REVIEW COMMITTEE GUIDELINES ON ROOF SELECTION

New roofing manufacturer, style, and color additions to the database of approved roofing material will be allowed using the following guidelines. All additions to the database will be through petition to the Architectural Review Committee. The Committee will review the new selection based upon the guidelines and recommend to Sherbrook Inc. addition of the new product(s) to the database. The following guidelines will be applied to any petition for inclusion of a new roofing material:

- Any new asphaltic material must be of a dimensional quality. Dimensional quality will include either multilayers or shading to give the appearance of wood shake roofing.
- 2. Any new asphaltic material must have a minimum of a 40-year warrantee.
- 3. Any new color will be an earth tone and will be a shade similar to the current shades of weathered wood shake.
- 4. Any new roofing material based on a technology other than asphalt will have the look of wood shake.
